

Extend the life of your floors

# ENTRANCE MATTING

## THREE MAT SOIL MANAGEMENT PROGRAM

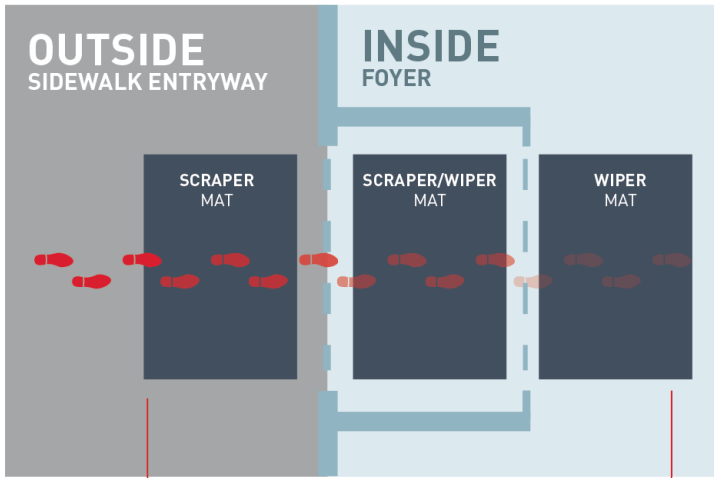

Quality entrance matting can be your front-line defense against dirt and moisture that will attack your property investment. **We** can help you stop up to 95% of all dirt, water and grime from being tracked into your building with the use of our **THREE MAT SOIL MANAGEMENT PROGRAM**.

**SAVE ON CLEANING COSTS AND PROTECT YOUR INTERIOR FLOOR SURFACES FROM EXTENSIVE DAMAGE AND WEAR TODAY!**

*Allow us to show you how we can save you hundreds of dollars annually with better looking and better quality matting.*

### SCRAPER & WIPER MAT

**THREE 4'x6' MATS**  
(12' OF MATTING)

## STEP ONE

### YOUR FIRST LINE OF DEFENSE! Outdoor Scraper Mat

A low profile mat designed for outdoor use at building entrances to effectively scrape mud and large soil particles from footwear before it is tracked into the building. Scraper mats are made from durable 100% nitrile rubber with molded face treads that provide an excellent anti-slip surface.

## TRAP WATER AND DIRT!

### Indoor/Outdoor Scraper/Wiper Mat

An indoor/outdoor mat provides a unique 'waterdam' that holds and retains large quantities of water that occurs with high levels of foot-traffic during winter months from snow and slush. Dirt and moisture will now stay right where you want it! Rubber reinforced face nubs work to remove and trap soil while allowing large amounts of dirt to be stored beneath shoe-level to eliminate further tracking. These 'nubs' stop the pile from crushing and greatly extend the performance life of this mat.

# STEP TWO

Don't let 'slip and falls' get you down. Our entrance matting is made with SBR or 100% Nitrile rubber backing that will not crack or curl. Bevelled edges and low profile features have been included to prevent any tripping hazards. Your complete satisfaction is guaranteed for the entire life of our product.

**100%**  
GUARANTEED

# STEP THREE

## YOUR THIRD WEAPON!

### Indoor Wiper Mat

Finally any remaining dirt or moisture is wiped off foot-wear by this carpet faced wiper mat made with 100% recycled content reclaimed from plastic, making them exceptionally fade resistant, eco-friendly and stain-resistant. Use this mat on all interior traffic lanes to prevent soil or wear patterns from developing.
